

Aditya Arul Manalan

UI/UX Designer · Product Designer

+91 63629 29838 · aditya.arulmanalan@gmail.com · [Portfolio](#) · Chennai, India

SKILLS & TOOLS

Design	Figma, UI Design, Wireframing, Prototyping, High-Fidelity Mockups, Responsive Design, Mobile Design
UX Practice	User Research, Design Thinking, Usability Auditing, Information Architecture, UX Writing
Visual	Typography, Color Theory, Visual Hierarchy, Layout Systems, Dark-Mode Design, Micro-interactions
Other	HTML, CSS, Blender (3D basics), Component Library Design, Style Guide Authoring

EXPERIENCE

- UI/UX Team Lead** · Cherry+ Network · SRMIST May 2026 – Present
- Responsible for leading the club's UI/UX team — overseeing design direction, running design reviews, and coordinating deliverables across active club initiatives.
 - Tasked with establishing shared Figma component libraries and visual style guides to ensure consistency across all team output.
- UI/UX Intern** · Cherry+ Network · SRMIST Sept 2025 – April 2026
- Designed UI mockups, wireframes, and high-fidelity layouts for 3 club events and their associated web pages.
 - Streamlined design-to-handoff by introducing annotated Figma specs, cutting back-and-forth with developers on ambiguous briefs.

PROJECTS

- IMDb Redesign** · Desktop Web Concept · Figma 5 weeks
- Audited 8 key IMDb page templates, identified 12+ inconsistent interaction and spacing patterns, and redesigned them into a unified component system.
 - Standardised card hierarchies and layout spacing under a single dark-mode design language, cutting visual noise across all page types.
 - Produced annotated desktop mockups optimised for scannability — focused on information hierarchy, whitespace, and cognitive load reduction.
- PingMyRoom** · Mobile App · 0→1 Concept · Figma 3 weeks
- Designed a hostel cleaning-request app from problem framing through high-fidelity prototype, compressing the request flow to a single tap with live status tracking.
 - Structured issue reporting into 4 simple categories, eliminating long-form text input and reducing decision friction for first-time users.
- Coffee House** · Desktop E-Commerce Concept · Figma 4 weeks
- Designed high-fidelity desktop screens across 6 core user pages, establishing a warm, coffee-inspired visual identity to aid product discovery.
 - Introduced a Save/Like micro-interaction separating browsing intent from purchase commitment — addressing a documented UX pattern linked to reduced cart abandonment.

EDUCATION

- B.Tech — Electronics & Computer Engineering** · SRM Institute of Science and Technology 2025 – 2029
- Current CGPA: 9.56 / 10 (Semester 1 results; Semester 2 pending).
 - Coursework spans hardware engineering fundamentals alongside software and computer science.
